EDUCATION

Georgia Institute of Technology, Atlanta, GA

Expected Graduation: May 2027

Bachelor of Science in Literature, Media, and Communication, Concentration: Media and Design

- *Certificate in Marketing (In-Progress)*

Cumulative GPA: 3.27/4.0

PROJECT EXPERIENCE

Window Pains Game, *Game Studio*, Atlanta, GA

January 2026 – Present

- Co-develop a 2.5D local/online multiplayer co-op game using Unity and C# scripting
- Design interactive game mechanics, user interface, and in-game levels
- Produce original music and sound effects using BandLab, improving game immersion
- Deliver game demos and pitches, communicating mechanics, design intent, and user experience

A-MAN YouTube Channel, Atlanta, GA

February 2025 – Present

- Produce and manage 10+ original short films, strengthening abilities in storytelling and creative direction
- Write, direct, shoot, act, and edit using Adobe Premiere Pro, demonstrating end-to-end production expertise
- Compose and integrate original soundtracks, showcasing skills in music production and post-production

JumpRace Micro, *Media Device Architecture*, Atlanta, GA

August 2025 – December 2025

- Developed an original Game Boy Advance title featuring a variety of fast-paced, arcade-style minigames
- Implemented diverse gameplay mechanics including platforming and shooting across 5 unique levels
- Created a dynamic player experience by integrating multiple gameplay styles into a cohesive, engaging project

Short Film Projects, *Cinematography*, Atlanta, GA

August 2025 – December 2025

- Filmed and edited 6 projects using professional lighting and camera equipment
- Created shot diagrams, call sheets, and equipment lists following industry-standard production workflows
- Collaborated in team-based film sets, enhancing communication and understanding of set operations

TravelMate Website, *Objects and Design*, Atlanta, GA

February 2025 – April 2025

- Designed a travel-planning web application using Django and Python
- Owned end-to-end development of UI/UX designs, implementing a responsive interface across all user flows
- Constructed UI assets and mockups using Figma, Adobe Photoshop, and Adobe Illustrator
- Integrated AI-driven itinerary suggestions and real-time weather tracking via external APIs
- Led Agile sprint reviews, communicating design decisions and collaborating across teams
